## DETAILED ACTION

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-6 and 7-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 and 11-14 respectively of U.S. Patent No. 6,714,526. The conflicting claims of the present application No. 10/719,807 are exactly identical to the US issued Pat. 6,714,526, since the current application and the issued patent to the same applicants are not patentably distinct from each other therefore the claims of the present application are not patentable.

Both, the subject application and the U.S. Patent No. 6,714,526, have claim languages that are phrased slightly differently to claim the same subject matter, thus they are not patentably distinct from each other.

***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 1, and 7 are allowed. The prior art discloses an LAS-CDMA communications system with specifically designed codes referred to as "LS" and "LA" codes used to spread signals for transmission and identify the cell and/or sector within a wireless network that a mobile is communicating with a particular base station.

The prior art however fails to disclose the sizing of subsets of LS codes which comprises of a number of LS codes as function of a "window size" referred to as the interference free window (IFW).
